

# Anthony Guzman R.

## FULL STACK DEVELOPER

La Florida, Santiago, Chile

+56 9 8836 3377

Anthonyjgr28@gmail.com

Full Stack Developer with training as a Web Developer. Experience working in NodeJS, React, Redux, SQL among other technologies. I led the creation of an E-commerce for the sale of audiovisual electronic products and another for the sale of fruits and vegetables. With creative thinking, problem solving, teamwork, communication and autonomy.

## PROFESSIONAL EXPERIENCE

### Complex, Buenos Aires, Argentina (remote) - Full-Stack Developer - March - April 2023

I worked to develop a full responsive SPA with a team of 8 people. This time my role was as a front-end developer, I used agile and scrum methodologies. Among my contributions to the project are the following components and features:

Landing Page, 404, Loader, Nav bar (make it responsive), Dashboard side bar (make it responsive), Footer, I worked on the styles of the home page and made the entire component responsive, Review Cards, with conditional rendering, general support in styles and responsive, UX/UI contributions and logical code development.

The most challenging thing was to achieve the integration of fully interactive and fast 3D technology within the project, considering the processing capacity of most devices, and the loading time due to the complexity of the OBJs and their weight.

**Technologies used in the project:** Node-Postgre SQL-Express-React-Redux-Tailwind-Css-Spline-3D Max-Cloudunady-Sweet Alert-Auth0-DayJS-Figma-Vercel-Stripo-3DS Max-Mercado Pago.

### Fruti Store Spa, Santiago, Chile - E-commerce project leader FrutiStore - February 2023

I worked on designing the business model together with my business partner and the work team, inventory system and data structure, configuration and implementation of the web application using predefined templates, associating payment methods, inventory system, sku, website optimization for google positioning through fast loading and other requirements and SEO.

## PROJECTS

### Full Stack Web Developer - Complex Gym - Complex Gym, Buenos Aires, Argentina - March - April 2023

Technologies used in the project: -Node-Postgre SQL-Express-React-Redux-Tailwind-Css-Spline-3DS Max-Cloudunady-Sweet Alert-Auth0-DayJS-Figma-Vercel-Stripo-3DS Max-Mercado Pago.

My role in the development team was as a front-end developer.

My greatest contribution was the integration of completely interactive and fast 3D technology within the project, considering the processing capacity of most devices, and the loading time due to the complexity of the OBJs and their weight. To achieve this, I had to study the Spline documentation and make all the integrations in the different parts of the project.

## SKILLS

- HTML
- CSS
- Javascript
- React
- Redux
- Spline
- Node.js
- English B2
- Express
- Postgres
- Sequelize
- Facebook business manager
- Google analytics
