Professional Profile

I am a versatile Full Stack Developer with extensive experience in Web Development, e-commerce, IoT solutions, and CRM systems. Throughout my career, I have successfully led and contributed to a variety of projects, including business webpages, e-commerce platforms, IoT data monitoring solutions, and custom CRM applications. My expertise spans frontend and backend development, UX/UI design, and system architecture. I excel in collaborative environments, consistently seeking to enhance my technical and soft skills. My primary goal is to drive innovation and deliver highquality, efficient solutions that meet and exceed client expectations. I am committed to continuous learning and excellence in every project I undertake.

Professional Experience

Chiki Icecream, Tennessee, USA
Full Stack Developer Site Administrator (Contractor) | July 2024 Present

- Designed and developed the business webpage with an automated email notification system for clients and the sales team.
- Developed backend services to manage user administration, event creation, and login/logout functionalities for the CRM platform.
- Created a CRM application similar to Trello or Jira for managing website and event requests, with a Kanban system for tracking client requests based on business steps.
- Improved the business's online presence, directly impacting sales by enhancing the sales process and creating a user friendly form that generates leads.
- Achieved excellent SEO results, scoring 100 points in recommended practices and 92 points in SEO for both mobile and desktop devices.
- Designed the entire architecture, web services, and deployment. Integrated different routes and services in the API for seamless connectivity between the business webpage and the CRM.
- Technologies: React, Vite, Tailwind CSS, React Router DOM, Axios, Node.js, Express, JWT, MongoDB, Mongoose, Bcrypt, Nodemailer, GitHub, Vercel.

Kasher Services, Pucon, Chile
